## The National Banking Scheme.

A new paper has recently been started in Milwaukee, called the Daily Union. It by the Union Club at the meeting Monday on the buildings and stock. There is some professes to represent the interests of la- evening. boring men, and assumes to be, peculiarly, their organ. To this we have no objection, but rejoice always in every effort which ennobles labor, and the tendency of which is | whereas, secret organizations exist and are to place those who toil in their proper position in the social and political scale.

men's organ we are somewhat astonished and destruction of our brave volunteer at its support of the national banking soldiers and armies in the field, but the scheme now before congress. That plan proposes to give new power and a longer lenso of life to banks of issue, whose popul to establish an oligarchy, with those in larity has been waning for many years, so supreme power who are now traitors in that we had a prospect of their total ex. arms, with the institution of negro slavery tinction: Bankers live, without work, up- barous and cruel than the Sepoy; and on the toil of labor, and all laboring men whereas also a disloyal party is being orwho have a clear idea of the immense sacrifices their class is making to support the moneyed class, ought to rejoice at any prospect of being relieved from the burdens | and controlled by such secret concluses of borno by them. But as usual, some of tories and traitors. Now, therefore, we them fall into the delusion that they cannot law-abiding and loyal citizens of the United live without keeping this "old man of the sen" upon their shoulders.

It is certain that the nation must have means to carry on the war. It is equally clear that it cannot borrow gold for this purpose, and must therefore use its credit. Why not use it directly, by the issue of its own notes, which will circulate without interest as currency, everywhere uniform in value, instead of selling its bonds bearing interest at six per cent, and authorizing banking corporations to issue their local currency to the amount of the national stock held by each?

The objection stated by the Union is that its opponents will depreciate the value of the national currency; that they have already done so fifty per cent. We think this is a mistake. If the banks have dopreciated the price of "greenbacks," they have done the same thing with their own currency, inasmuch as state paper curren. such place in the city of Junesville, and at citizens. There was said to be some threats cy is lower in the market than greenbacks; such hour of the day as the Club may from among the soldiers of lynching and hangthe banks do now everywhere charge a pre- Thirty members shall constitute a quorum mium of one or two per cent. over their for the transaction of business. own paper, when they sell it for that of the government. It is not likely that the banks have entered into a conspiracy to depreciate their own money by raising the price of gold, and if they have not, then they have not done the same thing for greenbacks, which are higher than any other paper money in the market; scarcer and more sought for by the people.

The speculation in gold does not depreclate greenbacks, but is produced by purchases of cotton, which must be carried on in gold, and by the absorbtion of the stocks held abroad by timid people, and forced upon our market. It is temporary and is not caused by the redundancy of treasury notes. These are scarce and hoarded by banks and judividuals. The universal demand in the west is for more government paper which every one can use; and as few stocks as possible, which none but the rich ever handle. Gold has become a commodity like cotton, wheat and pork, and goes ap and down in the market from the same the powers and perform all the duties of age. causes that operate upon these articles. It is, consequently, no more a standard of value than wheat or cotton, and to say that our national currency is depreciated because gold is worth \$1.58 is just as much signed by the president and countersigned an error as to insist that the rise in the price of produce depreciates a paper dollar having the government sanction. Our standard of value is government paper, and no attempts of a round-about issue over the counters of banks can make it otherwise, while the robellion exists.

Congress ought to see this inevitable state of things and conform its legislation to the wants of the country, and not fear the influence of capitalists. They mean to protection and government thereof as it throw the burdens of this war upon labor, if possible; and their plan is seen in this national banking scheme, out of which they will make immense profits, besides their tarces, all of which must be paid by the labor of the country. If congress would let national banking alone, issue treasury notes and tax all banks, we should save the interest on the national debt, have a uniform currency, and a low rate of exchange.

We are quite sorry to see the Union, an organ of the laboring men of this state, advocating a measure which will throw the burden of the interest of a vast national debt and never-ending cost of converting local currency into exchange, (which might now be saved,) upon the toiling thousands who produce all the wealth of the country, and pay all its debts and expenses. We hope to see it reform its opinions, in this

- 🛫 - Legislative.

In the sanato on Tuesday there was considerable discussion upon the request of the committee on federal relations, for further time for the consideration of certain reso lutions of a party character heretotore introduced by Senator Earnest. Sen. Clark took the position that the President of the United States had "violated the constitution of the country every day since he had been inaugurated into office." He had always been in favor of sustaining the government; but had opposed the war from the commencement. He was aware that he had differed in this respect, from most of his party, in the start, but now, as he understood it, the democratic party was unanimous in its opposition to the war, and action the senate adjourned. In the proceedings of the assembly we

see nothing of special interest. Mr. Spaulding introduced a bill to ex-

tend the time for the collection of taxes in the city of Janesville, which was passed under a suspension of the rules.

R. J. RICHARDSON.

THE satisfaction which the Richardson Drill gave in 1862 has induced me to Make Double the Number for 1863.

Adapted to the Peculiarities of this Soil. which is very difficult to till.

More than three hundred of these drills were used in this vicinity last spring, and it is universally conceded that the Hichardson Drill is

PERFECTLY ACCURATE

of any Drill yet introduced.

The drills of 1868 are readily changeable from double to single rank. The points are longer, sharper and heavier than those of 1862, which render them better adopted to the hard and crusty soil of early fall plowing. Not withstanding the

DAILY GAZETTE.

The Sinking of the Hatteras.

United States Consulate, Kingston, Jamaica, Jan. 21, 1863. Sin:-It is my painfal duty to inform the department of the destruction of the U.S. steamer Hatterss, recently under my com-mand, by the rebel steamer Alabama, on the night of the 11th inst., off the coast of Texas. The circumstances of the disaster are as follows:

On the afternoon of the 11th inst., at 3:30 o'clock, while at anchor in company with the fleet under Commander Bell, off Galveston, I was ordered, by a signal from the flag ship Brooklyn, to chase a sail to southward of eastward. I got under way immediately, and steamed with all speed in the direction indicated. After some time the strange sail could be seen from the Hatteras, and was ascertained to be steamer, which fact I communicated to the flag ship by signal. I continued chase rapidly, and gained upon the surprisions vensel. When within about four miles of the vessel, I observed that she had ceased to steam, and was lying broadside and await ing us. It was nearly 7 o'clock, and quite dark; but, notwithstanding the obscurity of the night, I felt assured, from the general character of the vessel and her maneuvres, that I should soon encounter the rebel steamer Alabama. Being able to work but four guns on the side of the Hatteras, two short 32-pounders, one 30 pounder rified gun, and one 20-pounder rified gun, I concluded to close with her, that my guns might be as effective as possible. I came

within easy speaking range, and upon asking, "What steamer is that?" I received answer, "Her Brittanic Majesty's ship Vixen." I replied that I would send a boat aboard, and immediately gave the order. In the meantime both vessels were changing their positions, the stranger endeavoring to gain a desirable position for a raking Almost simultaneously with the piping

away of the boat, the stranger again re-plied, "We are the confederate steamer Alabama," which was accompanied with a broadside. I, at the same moment, returned fire. I steered directly towards the Alabams, but she was enabled, by her great speed, and by the foulness of the bottom of the Hatteras and consequently her diminished speed, to thwart my attempt, when I had gained a distance of but thirty yards from her. At this range, musketry and pistol shots were exchanged. Firing continued with great vigor on both sides. At length a shell entered amidships in the hold, setting fire to it, and at the same instant a shell passed through the sick bay, exploding in an adjoining compartment, also producing fire. Another entered the cylinder, filling the engine room and deek with steam, and depriving me of any pow-er to maneuvre the vessel or to work the

pumps, upon which the reduction of the fire depended. With the vessel on fire in two places, and, beyond human power, a bopeless wreck; with her walking beam shot away and her engine rendered useless. I still maintained an active fire, with the double hope of disabling the Alabama, and attracting the attention of the fleet off Galveston, which ecording to the amount of wool required to make them. | was only twenty-eight miles distant. It was soon reported to me that shells had en-tered the Hatterss at the water line, tearing off entire sheets of iron; that the water was rushing in, utterly defying every attempt to remedy the evil; and that she was rapidly sinking. Learning this melancholy truth, of the deck. I felt that I had no right to secrifice, uselessly and without any desirable re-

sult, the lives of all under my command. To prevent the blowing up of the Hatteras from the fire, which was making much progress, I ordered the magazine flooded, and afterwards a lee gun to be fired. The Alabama then asked if assistance was desired, to which an affirmative answer was given. The Hatterns was now going down, and, in order to save the lives of my officers and men, I caused the armament on the port side to be thrown overboard. After considerable delay, caused by a report that a steamer was seen coming from Galveston, the Alabama sent us assistance; and I have the pleasure of informing the department that every living being was conveyed safely

from the Hatteras to the Alabama. Ten minutes after leaving the Hatteras went down, bow first, with her pennant at her mast head, with all her muskets and stores of every character, the enemy not

The battery upon the Alabama brought into action against the Hatteras numbered seven guns. From the character of the contest, and the amount of damage done to the Alabama, I have personally no reason to believe that any officer failed in his duty. To the men of the Hatteras I cannot give too much praise. Their enthusiasm and bravery were of the highest order. I inclose the report of the assistant surgeon, by which you will observe that five men were wounded and two killed. I am, very respect'y, your ob't serv't,

The Advisor.

The following are the advantages this chade possesses over a gluss one: First, the cost is hardly one fourth. Second, repairs are easily made. Third, they are light; they do not require watering, no matter how intense the heat of the sun; the plants are tense the heat of the sun; the plants are not struck down or burnt, faded or checked in growth; neither do they grow up so long, sickly and weakly, as they do under glass, and yet there is abundance of light. Fourth, the heat arising entirely from below is more equable and temperate, which is a great bject. The vapor arising from manure and earth is condensed by the cool air passing over the shade and stands in drops which will be accurately futed to the person necesses them. These glasses are months did every variety of a style; and will be sold at the lowest prices. The attention of all who require an easy setting and comfortable article, of a experior quality, is invite to my stock, as I can stilt them in all cases.

The Sinking of the Hatterns,

United States Consulate; KINGSTON, Jamaica, Jan. 21, 1863.

Sin :- It is my painful duty to inform the. lepartment of the destruction of the U.S. UPHOLSTERING. iteamer Hatteras, recently under; my command, by the robel steamer Alabama, on. the night of the 11th inst., off the coast of Texas. The circumstances of the disaster dene in the most approved manner, on the shortest no are as follows:

On the afternoon of the 11th inst., at 3:30 o'clock, while at anchor in company with the fleet under Commander Bell: off Galveston, I was ordered, by a signal from the flag ship Brooklyn, to chase a sail to southward of eastward. I got under way immediately, and steamed with all speed in the direction indicated. After some time the strange sail could be seen from the Hatteras, and was ascertained to be a steamer, which fact I communicated to the flag ship by signal. I continued chase rapidly, and gained upon the suspicious vensel. When within about four miles of the vessel, I observed that she had censed to steam, and was lying broadside and await-

ing us. It was nearly 7 o'clock, and quite dark; but, notwithstanding the obscurity of the night, I felt assured, from the general character of the vessel and her manouvres that I should soon encounter the rebel steamer Alabama. Being able to work but four guns on the side of the Hatteras, two short 32-pounders, one 30-pounder rifled gun, and one 20 pounder rifled gun, I concluded to close with her, that my guns Vixen." I replied that I would send a boat aboard, and immediately gave the order. In the meantime both vessels were change ing their positions, the stranger endeavor-

ing to gain a desirable position for a raking Almost simultaneously with the piping away of the boat, the stranger again replied, "We are the confederate steamer Alabama," which was accompanied with a broadside. I, at the same moment, return. abama, but she was enabled, by her great speed, and by the foulness of the bottom of the Hatteras and consequently her diminished speed, to thwart my attempt, when I had gained a distance of but thirty yards

length a shell entered amidships in the setting fire to it, and at stant a shell passed through the sick bay. exploding in an adjoining compartment, 8th United States Infantry also producing fire. Another entered the cylinder, filling the engine room and deek with steam, and depriving me of any power to maneuvre the vessel or to work the pumps, upon which the reduction of the ire depended.

into action against the Hatteras numbered seven guns. From the character of the contest, and the amount of damage done to the Alabama, I have personally no reason to believe that any officer failed in his duty. To the men of the Hatterns I cannot give too much praise. Their enthusiasm and bravery were of the highest order. I inclose the report of the assistant surgeon, by which you will observe that five men were wounded and two killed.

They heat the eggs well separately, may them beat the eggs well separately, mix them with the former; spread the mixture with a paint-brush over the surface of the coltou, allowing each coat to dry before another is put on, until they become water proof The following are the advantages this shade possesses over a glass one: First, the cost is hardly one fourth. Second, repairs are easily made. Third, they are light; they do not require watering, no matter how intense the heat of the sun; the plants are not struck down or burnt, faded or checked in growth; neither do they grow up so long, sickly and weakly, as they do under glass, and yet there is abundance of light. Fourth, the heat arising entirely from below is more equable and tomperate, which is a great Agentities of Janestille and vicinity sanounce to the Citizens of Janestille sand vicinity sanounce to the Citizens of Janestille sanounce to the Citizens of Janestille sand vicinity sanounce to the Citizens of Janestille sanounce to the Citizen

## The National Banking Scheme.

A new paper has recently been started in Milwaukee, called the Daily Union. It professes to represent the interests of la- evening. boring men, and assumes to be, peculiarly, their organ. To this we have no objection, but rejoice always in every effort which ennobles labor, and the tendency of which is to place those who toil in their proper position in the social and political scale.

Inarmuch as the Union is a workingmen's organ we are somewhat astonished at its support of the national banking scheme now before congress. That plan proposes to give new power and a longer lease of life to banks of issue, whose popularity has been waning for many years, so that we had a prospect of their total extinction. Bankers live, without work, upon the toil of labor, and all laboring men who have a clear idea of the immense sacrifices their class is making to support the moneyed class, ought to rejoice at any prospect of being relieved from the burdens borne by them. But as usual, some of them fall into the delusion that they cannot live without keeping this "old man of the sea" upon their shoulders.

It is certain that the nation must have means to carry on the war. It is equally clear that it cannot borrow gold for this purpose, and must therefore use its credit. Why not use it directly, by the issue of its support in this deadly struggle for Free In own notes, which will circulate without interest as currency, everywhere uniform in al, patriotic men to unite with us in this value, instead of selling its bonds bearing noble and glorious purpose. And we do interest at six per cent., and authorizing backing corporations to issue their local currency to the amount of the national stock held by each?

The objection stated by the Union is that its opponents will depreciate the value of the national currency; that they have already done so fifty per cent. We think this is a mistake. If the banks have dopreciated the price of "greenbacks," they have done the same thing with their own currency, inasmuch as state paper currency is lower in the market than greenbacks: the banks do now everywhere charge a premium of one or two per cent. over their for the transaction of business. own paper, when they sell it for that of the government. It is not likely that the banks have entered into a conspiracy to depreciate their own money by raising the price of gold, and if they have not, then they have not done the same thing for greenbacks, which are higher than any other paper money in the market; scarcer and more sought for by the people.

The speculation in gold does not depreciate greenbacks, but is produced by purchases of cotton, which must be carried on in gold, and by the absorbtion of the stocks held abroad by timid people, and forced upon our market. It is temporary and is not caused by the redundancy of treasury notes. These are scarce and hoarded by banks and individuals. The universal demand in the west is for more government paper which every one can use; and as few stocks as possible, which none but the rich ever handle. Gold has become a commodity like cotton, wheat and pork, and goes ap and down in the market from the same the powers and perform all the duties of causes that operate upon these articles. It is, consequently, no more a standard of value than wheat or cotton, and to say that our national currency is depreciated because gold is worth \$1.58 is just as much an error as to insist that the rise in the price of produce depreciates a paper dollar having the government sanction. Our standard of value is government paper, and no attempts of a round-about issue over the counters of banks can make it otherwise, while the rebellion exists.

Congress ought to see this inevitable state of things and conform its legislation to the wants of the country, and not fear the influence of capitalists. They mean to protection and government thereof as it throw the burdens of this war upon labor, if may deem expedient and proper. possible; and their plan is seen in this national banking scheme, out of which they will make immeuse profits, besides their taxes, all of which must be paid by the labor of the country. If congress would let national banking alone, issue treasury notes and tax all banks, we should save the interest on the national debt, have a uniform | ded, that no member shall be expelled until currency, and a low rate of exchange.

We are quite sorry to see the Union, an and that the person so charged be first no organ of the laboring men of this state, ad- tified, and have the privilege of being heard. vecating a measure which will throw the burden of the interest of a vast national debt and never-ending cost of converting local currency into exchange, (which might we have published) and the appointment of now be saved,) upon the toiling thousands a committee to report by laws for the club. who produce all the wealth of the country, and pay all its debts and expenses. Official Report of Colonel Higginson of the South Carolina Colored Regiment.

From the official report of Col. Higginor, we make the following extracts: Ox Board rus Steamen "Ben Derond," | Sunday, February 1, 1853.

General :- I have the honor to report he safe return of the expedition under m command, consisting of four hundred and sixty-two officers and men of the First Regiment of South Carolina Volunteers, who left Beaufort on January 23d, 1863, on board the steamers John Adams, Flanter and Ben Deford.

So complete was our victory that the enemy scattered, hid in the wood all night, not returning to his camp, which was five miles distant, until noon next day until too late to follow up our advantage. Had I listened to the urgent appeals of my men, and pressed the flying enenmy, we could have destroyed his camp; but in view of the darkness, his uncertain numbers and swifter motions, with your injunctions of caution, I judged it better to rest satisfied

GRAIN DRILL

## Grass Seed Sower.

HAVING sold over three hundred of these drills in this state the past year, and and eleven hundred having been used in northern Illinois and this state during the same time, all of them giving satisfaction, has induced me to advertise some of the peculiar properties of this drill over others.

It is a double rank drill, with a driver's sest attached or not at the pleasure of the purchaser. It will sow all kinds of grain and grass seed. It will not break or out the grain, and will sow from 1/2 to 5 bushels per acre.

It will sow correct when driving fast or slow. The

quantity is guaged without any change of gear, can be saily changed from unuse to single rank, can in sow-ng use one half the drill or less if desired. THE DRIVER'S SEAT
is so attached that the operator can drive and work
his delil with perfect ease, without the trouble of getting off to turn around, and he six in such a position
that he can see the whole operation and know that
every tube issowing. The delil is so combined that
there is no weight upon the horse's neck when the
driver is on or off the seat.

### This improvement, combined with the Steel Spring Shoval

or rooty and slony ground will clear itself from roots and stones or any obstacle that may come in its way, without the necessity of stopping to replace a broken pin, thereby causing trouble and delay—renders this The Chespest and Best Drill ever offered, and we think that every cardid thinking farmer will agree with us in this respect. At the Ohio State Fair, in September last, in Cleve.

Took the First Premium over the Buckeye and Star Drills and others, so the people can form their own opinions in relation to what is thought of these drills at home. It is also conceded that this drill is the

Lightest Draft and the Easiest for the Icam of any drill made. These drills will be on exhibition at the

GORN EXCHANGE, JAMESVILLE, and other prominent places in the state, and also by the namerous farmers who used them has year through out this county and state. These drills are

WARRANTED

to be in good order, to work well during the seeding if properly used; to distribute the seed regularly, and sow any quantity of seed per acre, commonly sowed broadcast; to be well case, of good material, and durable with proper care; if the purchaser shall follow the directions accompanying the drills, in using the same.

man of this regiment was killed or wound ed, though the steamer is covered with bul let marks, one of which shows where our brave Captain Clifton, commander of the vessel, fell dead beside his own pilot house, shot through the brain by a Minie hall Major Strong, who stood beside him, escap Major Strong, who stood beside him, escaped as if by magic, both of them being unnecessarily exposed without my knowledge.

This river expedition was not undertaken in mere bravado. Captain Sears, U.S.A., the contractor of Fort Clinch, has urged upon the war department to endeavr to obtain a large supply of valuable brick said to remain at the brick yards, thirty miles up the St. Marys, from which war department had referred the matter to Col. Hawley, who approved my offer to undertake the enterprise. Apart from this, it was the desire of Lieut. Hughes, U.S. N., commanding United States steamer Mohawk, now lying at Fernandina, to obtain information regarding a rebel steamer, the Berosa, said to be lying further up the river, awaiting an opportunity to run the block-ade, Both objects were accomplished. I brought away all the bricks, and ascertained Berosa to be worthless. I have the hon-or to state that I have on board the Ben Deford two hundred and fifty bars of the

40,000 large sized bricks, valued at about \$10,000, in view of the present high freights. I have also turned over to Judge Satla, ci-vil provost marshal at Fernandina, four horses, four ateers, and a quantity of agri-

er's operations in that location. I have seen with my own eyes, and left behind for want of means of transportation (and because brick was considered even more valuable) enough of the choicest southern lumber to load five steamers like the Ben Deford, an amount estimated et more than a million feet, and probably worth at Hilton Head \$50,000. I also left behind, from choice, valuable furniture by the housefull—pianos, china, etc., all packed up for transportation, as it was sent inland for safe keeping. Not only were my offi-cers and men forbidden to take any of these things for private use, but nothing was ta-ken for public use save articles strictly contraband of war. No wanton destruction was permitted, nor were any buildings burned, unless in retaliation for being fired upon, according to the usages of war. Of course no personal outrage was permitted

or ordered. At Woodstock I took six male prisoners whom I brought down the river as hostages, intending to land part of them before I reached Fernandina and release them on parole; but, in view of the ferocious attacks made upon us from the banks, this would seem an absurd stretch of magnanimity, and, by the advice of Col. Hawley, I

brought them for your disposal. At the same place we obtained a cannon and a flag, which I respectfully ask permission for the regiment to retain. We obtained, also, some trophies of a different description, from a slave jail, which I shall offer for your personal acceptance-three sets of stocks, of different structure, the chains and staples used for confining prisozers to the floor, and the key to the build-They furnish good illustrations of the infernal barbarism against which we contend.

We return at the appointed time, though there are many other objects which I wish to effect, and our rations are now nearly exhausted; but the Ben Deford is crowded rith freight, and the ammunition of the John Adams is running low.

We found no large number of slaves anywhere, yet we brought away several whole families, and obtained by their means the most reliable information. I was interested to observe that the news of the Presi dent's proclamation produced a marked effect upon them, and in one case it was of the greatest service to us in securing the hearty aid of a guide, who was timid and distrustful till he heard that he was legally free, after which he aided us gladly, and

Old Folks' Concert.

There has never been a more successful concert in this city than the one last evening. The hall was completely filled, and Reported for the Janesville Gasette, many left unable to get into it. Evident care had been taken in the preparation of everything connected with the concert, and not only was the singing excellent, but the costumes displayed every variety of style of the olden time, from the lustrous satin bridal attire to the plain calico gown; from the citizen's garb. Some feminine pen, however, versed in the names and mysteries of Other stuff unchanged. the toilet, is far more competent than ours to make a proper notice of this branch of the subject. This feature of the concert added much to its interest, and when "Sherburne," "Northfield," "Exhortation," and other old pieces carried the older portion of the audience back to singing school days, when "the intermission" was improved for a frolio among the singers, or the timid question at the door at the close to the belle of the school, "May I have the pleasure of seeing you home, to-night?" and when the swelling strains of grand "Old Hundred" filled the hall, the mind was hardly disenchanted of the effect of the ample white neckerchief, the high-backed comb, the capacious bonnet or the antin slipper which adorned our mothers in the days of their girlhood or womanly beauty. Some of the dresses used on this occasion, we are informed, were practicus family relica preserved from the "olden time." We judge there were about 50 singers engaged in the concert, embracing the best musical talent of the city and its vicinity. There were

two participants from Evansville.

Following this, was the introduction of a veritable spinning-wheel and reel upon the stage. The wheel was furnished from the family of Mr. H. P. Culver, of this city, where it has been kept for the last 43 years, and upon which his mother spun 60 years ago. Mrs. J. P. Dickson gave the audience an illustration of the manner of using it, and evinced a familiarity with it which must have been acquired in an age when something else than "street yarn" was a chief product of female industry.

The nett preceeds of the concert was \$155.85, which has been paid to the treasurer of the Ladies' Hospital Relief Society.

We feel authorized to tender the thanks of the community who have been delighted with a pleasant entertainment, and of the soldiers who will reap an almost priceless benefit in a time of trial and affliction, to all who have given their time and talents to this effort in their behalf.

A vote of the audience requested a repetition of the concert.

Gold has again started upward and was this morning quoted in New York at 1,59 5-6. The brokers here are offering 1,57, but cotton speculators will pay the New York rate. Old demand notes are on fer and the buying rate here is quoted at 1,55. One year cortificates are firm and higher. The Wall street quotation this morning was too, which is an advance of four per cent in one week. Seven thirties are quiet at 1,92 for unindersed. Silver is firm and higher. The brokers with accompaniments which produced a are paying 1,47s1,47% for large and 1,44 for small

> The demand for essiern exchange is only moderate and the market is quiet at par buying and 14 per cent promium selling. Currency is in good supply and easy. The advance in gold to 1,59% caused an excited and

buoyant market for breadatuds, and prices for all desoriptions ruled higher. Flour advanced 5c per barrot, but buyers did not enter the market freely and trans actions were limited. Wheat was in good request and advanced 2c per bushel, closing firm, with a tendency to still higher prices. Sales were made at \$1,21 for No 2 red, \$1,20a1,22 for No 1 spring, \$1,09a1,10 for No 2 pring, and £5a93c for rejected apring.

There was a firm and buoyant feeling in the market for corn and under an active demand by speculators the market advanced 13442c per bushel, with sales of mixed at 53a51c, rejected at 45c and new mixed at 46c. The demand for oats was more active, and prices improved Male per bushel, sales being made at 57s57Mc.

Live hogs were steads and firm at \$1,00a4,50 for fair to heary averages. Dressed hogs in good demand at

\$4,2044,95 for lots dividing on 200 ths. There is an active demand for cattle, with good inquiry. Sales were made at \$2,1218,10.

Barley quiet. Salus 05 bags at \$1,05 on track; 41 bags at \$1,10 delivered. Timothy seed is dull and nominal at \$2,00a2,20; 10 bage common sold at the luside quotation. Clover seed

la inactive and nominal at \$7,00. The inquiry for beans is less settre and prices are easier. We quote common to fair \$1,90a2,00, fair to

prime \$2,00a2,50. The market for broom corn continues quiet at \$140a

The demand is less active for butter but prices remain unchanged. We quote prime duiry at Ical7c, good to choice fickin Batte, common grades 10a12c. The demand for hids continues active and the market firm at the following prices: we quote green country Thinso, given sulted 656:90, green kip and calf 12a

## Union Meeting in Harmony.

A meeting on behalf of the Union will be held at the Harmony school house, on Tuesday evening, Feb. 24th. G. W. Lawrenceand others will address the meeting. A Union organization will probably be effected. A full attendance is desirable.

### Old Folks' Concert.

There has never been a more successful concert in this city than the one last evening. The hall was completely filled, and many left unable to get into it. Evident care had been taken in the preparation of GRAIN AND PRODUCE DEALERS everything connected with the concert, and not only was the singing excellent, but the costumes displayed every variety of style of the olden time, from the lustrous satin bridal attirs to the plain calico gown; from the military uniform of the revolution to the citizen's garb. Some feminine pen, however, versed in the names and mysteries of the toilet, is far more competent than ours to make a proper notice of this branch of the subject. This feature of the concert added much to its interest, and when "Sherburne," "Northfield," "Exhortation," and other old pieces carried the older portion of the audience back to singing-school days, when "the intermission" was improved for a frolic among the singers, or the timid question at the door at the close to the bells of the school, "May I have the pleasure of seeing you home, to-night?" and when the swelling strains of grand "Old Hundred" filled the hall, the mind was hardly disenchanted of the effect of the ample white neckerchief, the high-backed comb, the capacious bonnet or the satin slipper which adorned our mothers in the days of their girlhood or womanly beauty. Some of the dresses used on this occasion, we are informed, were precious family relics preserved from the "olden time." We judge there were about 50 singers engaged in the concert, embracing the best musical talent of the city and its vicinity. There were

The closing piece was "Rally round the flag, boys," executed in a manner and with accompaniments which produced a thrilling effect. When it was concluded, hearty cheers were given for the star-emblazoned emblem of a free people, and called out Jim Burgess in such a speech as

two participants from Evansville.

Following this, was the introduction of a veritable spinning wheel and reel upon the but buyers did not enter the market freely and trans stage. The wheel was furnished from the family of Mr. H. P. Culver, of this city, where it has been kept for the last 43 years, 2 red, \$1,20a1.22 for No1 spring, \$1,08a1,10 for No2 and upon which his mother spun 60 years spring, and 25a33c for rejected spring. ago. Mrs. J. P. Dickson gave the audience an illustration of the manner of using it, the market advanced 12/42c per bushel, with sales of and evinced a familiarity with it which | mixed at 53a64c, rejusted at 46c and new mixed at 46c. must have been acquired in an age when something else than "street yarn" was a chief product of female industry.

The nett proceeds of the concert was \$155.85, which has been paid to the treasurer of the Ladies' Hospital Relief Society.

We feel anthorized to tender the thanks of the community who have been delighted with a pleasant entertainment, and of the soldiers who will reap an almost priceless benefit in a time of trial and affliction, to all who have given their time and talents to this effort in their behalf.

A vote of the audience requested a repetition of the concert.

HIGHWAY ROBBERY .- About a mile and a half from Racine, Thursday night, a farmer by the name of Newman was returning home from town, when he was stopped by two men, who demanded his money. Refasing, he was struck twice on the back of the head with a hatchet, which rendered him senseless, when he was robbed of \$95, 00, which he had in his pockets. The villains have not been discovered. Newman's injuries, we learn, are not likely to prove

THE NEW TAX BILL .- The ways and means committee will in a few days report the tax bill revised. The tax on some articles will be largely increased; on others much reduced. It has been argued strongly within the committee that an increase of revenue will do more to sustain the credit of the government than anything save great victories in the field. Luxuries will be taxed, and what are called luxurious vices will be heavily taxed. Tobacco, whiskey, and other luxurious or vicious consumption, have never been taxed to any extent. In this country now they have got to

This delightful article for preserving and beautifying the human hair is again put up by the original proprietor, and is now made with the same care, skill and attention, which first created its immense and unprecedented sales of over one million bottles annually! It is still solid at 25 cents in large bottles. Two million bottles can easily be sold in a year when it is again known that the Kathuiren is not only the most delightful bair drawing in the world but that it deep. again known that the Kathuiron is not only the most delightful hair dressing in the world, but that it cleanses the scalp of sourf and dandruff, gives the hair a livrly rich luxuriant growth, and prevents it from turning gray. These are considerations worth knowing. The Kathairon has been tested for over twelve years, and is warranted as described. Any lady who values a beautiful head of hair will use the Kathairon. It is finally perfumed, cheap and valuable. It is sold by all respectable dealers throughout the world, occodenwas

There is scarcely any part of a Trimmers' stitching that cannot be better done with them than by hand; so, too, the saving of time and labor is very great. The table under these machines is 24 inchvery great. And the shuttle will hold, six times the usual quantity of thread. The large machines work as fast as small ones.

We would ask for our Lotter A machines; the special attention of Yest Makers; and Dress Makers; and all those who want machines for Light Manufacturing purposes. They embody the principles of the standard machines, making like them, the interlock stitch, and are destined to be as celebrated for Faully Sewing and light manufacturing purposes as our standard machines are for inchalacturing purposes in general.

We have always up had.

We have always on hand Bemming Guages, Silk Twist, Linen and Cotton Thread on Spools, Hest Machine Oil in Bottles, etc., etc. We manufacture our own Needles, and would wart all persons using our machines not to buy any others. We know that there are needlesseld of the most inferi-

23-All persons requiring information about Sewing Machines, their size, prices, working capacities, and the best methods of purchasing; can abtain it by souding one, or any of our Branch Offices for a copy of i. m. sincer & co.'s dazette,

We have made the above 'Reduction in Prices with the two-fold view of benefitting the public and ourselves. The public have been swindled by spurious machines made in imitation of ours. The metal in them, from the tron casting to the smallest piece, is of poor quality. Their makers have not the means to do their work well. They are little way in secret places, where it would be impossible to have at their command the proper me-chanical appliances. It is only by doing a great-busi-ness, and having extensive manufacturing establishness, and using exceptive manuscuming establishments, that good machines can be made at moderate prices. The best designed machines, fixely Made, are always liable to get out of prier, and are sure its cast considerable trouble and money to keep them in repair. The qualities to be looked for in a machine are: errelating of construction, great durability and repairly of construction, great durability and repairly of operation. with the least labor. Machines to combine these essen-tial qualities, must be made of the cost metal and finish-

We have made the above Reduction in Prices with the two-fold view of benefitting the public and ourselves. The public have been swindled by spurious machines made in imitation of ours. The metal in them, from the iron casting to the smallest piece, is of poor quality. Their makers have not the means to do their work well. They are hid sway in secret places, where it would be impossible to have at their command the proper mechanical appliances. It is only by doing a great business, and having extensive manufacturing establishments, that good machines can be made at moderate prices. The best designed machines, Radly Made, are always liable to get out of order, and are bure to adstonished the subject of the same three to adstone states and the same transition of oursel and many to keep them in repair. The qualities to be looked for in a machine are certainly of oursel admirability and reputity of operation, with the least above. Machines to combine these considerable troubles must be made of the bai metal and finish exist in the cast in the same than the second of the part metal and finish a grand scale, to do this.

The a machines are of machines, whose daily bread it. at the hour of ton o'clock in the forenoon of that day, the following described martgaged premises, to with all that certain sieus, parcel or tract of land situate, lying and being in this town of Magnolis, in the county of Reck and state of Wisconelis, and known and distinguished as a part of the porthwest quarter of the southwest quarter and a part of the northeast quarter of the southwest quarter and a part of the northeast quarter for the southwest of the southwest corner of section fourteen (14), commencing at a point eighty rods morth of the southwest former of section fourteen (15), running thence east forty-four rods, thence north thirty-five rods and three north forty-four rods and three and a half-feet, thence west one hundred and twenty rods, thence south eighty rods to the place of beginning, containing forty-three acts of land, ad to perfection. We have the ways and menns on a rand scale, to do this.

The purchasers of machines, whose daily bread it may concern, will find that those having the above qualities not only, work well at rapid as well as slow sates of speed, but lost long in the finest possible working order. Our machines, as made by us, will are more money with loss todor then any others, whether in limitation of ours or not.
